- Multimedia Volunteer | SPCC CIT Week: FUNTASTECH** 2023-2024

Work Experience

LINES & DOTS ADVERTISING COMPANY

Web Developer (450 - hour internship)

- Developed and maintained responsive company website features using React and Vite, implementing modern UI/UX designs, API integrations, frontend optimizations, and collaborative deployment workflows.

Projects

- Grade IT** -Full Stack Developer & Lead UI/UX Designer | Capstone Project 2025 - Present
 - Designed and developed an end-to-end comprehensive grading system using Vite-React, covering system flow, UI/UX and role-based such as Head, Admin, Professor, and Student components.
 - Implemented Head and Admin features including dashboards with KPIs, student enrollment and masterlists, academic year/section/course management, scheduling, teaching load assignment, announcements, and full CRUD user management.
 - Built data-driven Professor features with attendance logs, gradebook management, class and subject dashboards, pass/fail and at-risk analysis, section rankings, performance trends, and multi-level academic analytics with rule - based forecasting and AI-assisted prescriptive recommendations.
 - Developed a React Native mobile attendance system application for students and professors using semester-based signed QR attendance passes with offline accessibility, real-time QR attendance validation with student photo verification, manual attendance recording, offline attendance capture and synchronization, academic calendar, grade visibility, and class schedule viewer.
- Queue IT** - Full Stack Developer & Lead UI/UX Designer | Academic Project 2024-2025
 - Developed a virtual queuing web system using Laravel and PHP, handling system flow, UI/UX design, authentication, and role-based access.
 - Built Admin/Accountant and Student/Guest components with responsive, mobile-friendly interfaces.
 - Implemented an Admin dashboard with real-time queue metrics, analytics (transactions, statuses, wait/service time, peak hours), and queue trend visualizations.
 - Developed queue management features including queue control (start, cancel, reset, done/missed), transaction history with filters, operating hours, announcements, TV queue display, and email notifications.
 - Created a Student/Guest interface for transaction selection, real-time queue status tracking, browser notifications, and queue history.
- BS FARM** - Full Stack Developer & Lead UI/UX Designer | Academic Project 2023-2024
 - Developed a POS and inventory system for a poultry supply business using vanilla PHP, covering system design, UI/UX, and core business logic.
 - Built a dashboard displaying daily sales and profit, total products, best-selling items, stock status, monthly sales, and recent transactions.
 - Created a product and sales management features including category-based products, configurable pricing, real-time stock tracking, kilogram-based sales input, automatic price-quantity calculations, and payment method handling.
 - Implemented reporting and alert functionality with filtered sales reports (daily to yearly), PDF exports, transaction history, and stock-level alerts with category-based filtering for supplier restocking.

Skills

- Technical skills:** React, Vite-React, React Native, Python, Javascript, Javascript XML, Node.js, Laravel, CodeIgniter, PHP, AJAX, MySQL, CSS, Bootstrap, HTML, Vanilla PHP, Figma, Microsoft Office Applications (Excel, Word, PowerPoint)
- Soft skills:** Resilient, Adaptable, Problem Solver, Persistent at Learning New Skills, Thrives Both in Individual and Collaborative Setting, has Good Communication Skills and Time Management.

Certifications

- Microsoft Excel Training | SPCC (40 hours)** March - April , 2024
